Target new market opportunities

With quarterly data analysis and commercial insight into country specific PV market segments, this new report is critical for sales and marketing decision making for PV companies, equipment manufacturers, materials suppliers and PV systems integrators.

This report offers intensive data analysis and commercial insight into

- Country specific PV market segments
- Downstream supply chain structure and volumes (covered annually)
- Individual PV projects and customer listings
- Local PV funding programs
- Downstream company activity

Data Covered

- Market segmentation, sizes and drivers
- Federal/regional policies stimulating PV demand
- Project-by-project listings by segment
- Downstream channel structure and volumes (covered annually)
- Downstream market (installed system) pricing
- Major downstream company sales (covered annually)
- Rolling five-year market segment forecasts
- Major countries covered: Japan, China, India, and Australia

Key Questions Answered

- What are the most promising Asian markets?
- What are the key federal and local PV incentives that will drive residential, commercial, and utility projects?
- What were the largest PV projects in the past quarter?
- For market new entrants, which are the major downstream companies active in each country?
- Who is already active in these markets, both solar companies and customers?
