Become an early adopter with the most comprehensive report on this new emerging solar PV market.

This report provides unique insights on the largest PV consumers, primary demand drivers, barriers to entry, and the most favorable market segments in this region. It also identifies the key factors necessary to succeed in this market.

The report is a comprehensive resource for module suppliers, balance of system suppliers, project developers, and other companies targeting market-share gains across Latin America and the Caribbean. Critical information is available for creating prospect lists, conducting competitive benchmarking, and developing an effective market-entry strategy.

Data Covered

- Lists of top customers, utility companies, project developers, and financiers
- Analysis of local PV policies, market structures, regulations, and market drivers for each country
- Detailed opportunity breakdowns by on-grid and off-grid opportunities
- Proposed market entry strategies and barriers to entry
- Potential revenues across each sub-segment and region
- Detailed long-term market demand forecasts, including quarterly forecasts through 2013
- Demand segmentation by application and region

Markets covered in the report include Chile, Peru, Brazil, Mexico, Argentina, the Dominican Republic, and other Caribbean and Central American markets.
